

“Your Eastside Information Management Professionals”

Program Announcement

Program Title: Legacy Data Governance – How to Decommission Outdated Systems

Speaker: Tina Torres, CRM, PMP
Director/PwC, Forensics Technology—Information Risk Management

Date & Time: Wednesday November 9th, 5:30 pm to 7:30 pm

Location: Bellevue City Hall 1E-112
450 110th Ave NE, Bellevue, WA 98004

Cost: \$15

Chapter Members: Bring a Guest for **Free!** Bring your boss, a co-worker, or business associate at no cost. Please indicate the name of the guest in the comments section of the registration form.

Is your old data gathering dust in outdated systems? Does your organization own archaic systems and applications that need to be kept running because of the data that's kept within? While legal/regulatory requirements may make it necessary to continuously have old data accessible, the overhead cost to keep disks of outdated systems spinning is often significant and the business value of retaining the data is often low.

Tina Torres will talk about maintaining data found on obsolete systems and reducing costs. You will learn about

- Decommissioning old systems – turning the lights off and saving cost or reducing risks
- Understand the risks for keeping archaic systems and data beyond their required limits
- Find out about approaches to archiving and extraction of data required for retention while setting sunset dates for archaic applications and obsolete data.

A clean, compliant data footprint can be very refreshing!

About the Speaker:

Tina Torres has over 18 years of expertise in Information Governance (IG), Records Management, and eDiscovery. Currently she is a director within PwC's Information Risk Management practice, which she joined in 2015. Prior to her work with PwC, Tina was the Global Records Director at Microsoft, where she was instrumental in developing records management policy features in technology solutions such as Microsoft Exchange and SharePoint.

Her areas of expertise include strategic IG assessments and roadmaps, implementation planning, communication and change management advising, training development, and design of advanced information management metrics, strategies and methodologies. She draws much of her industry experience from her previous roles working closely with Pharmaceutical, Manufacturing, High Tech, Legal, Financial Services, Banking, Health Care and Energy companies in the US and Europe.

Tina speaks German (natively) and conversational French.
